BRIGHT COFFEE SHOP ANALYSIS

Insights & Recommendations for the CEO

March, 2026

Pearl Ramolotja

Data Processing and Analysis Steps

- Cleaned and transformed the dataset in Databricks
- Corrected price formatting issues
- Created calculated field

  Revenue=Quantity= Unit price

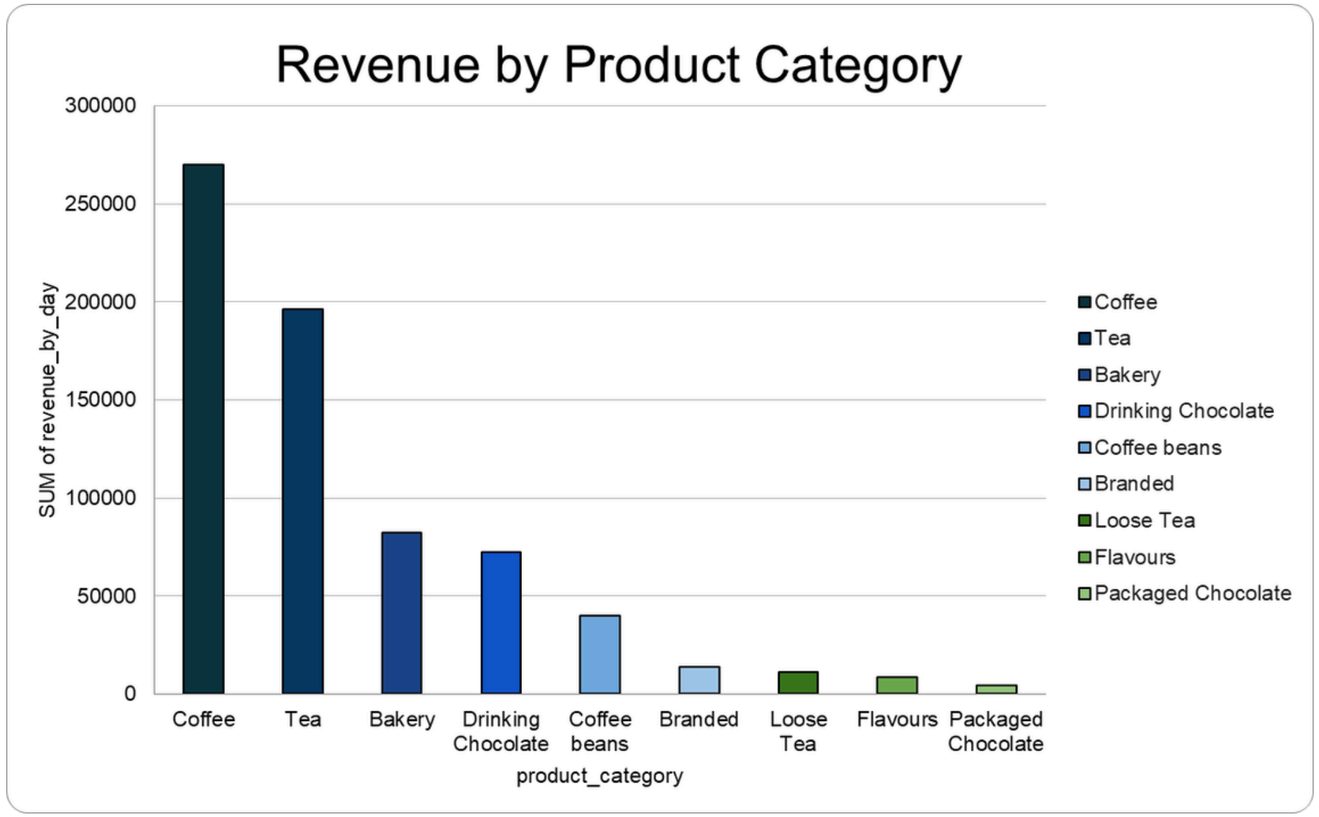
  Spend Bucket Categories

  Time intervals for transactions
- Exported the processed data into Google Sheets
- Built Pivot Tables and Charts to analyse patterns

Revenue by Product Category Analysis

Key Insights

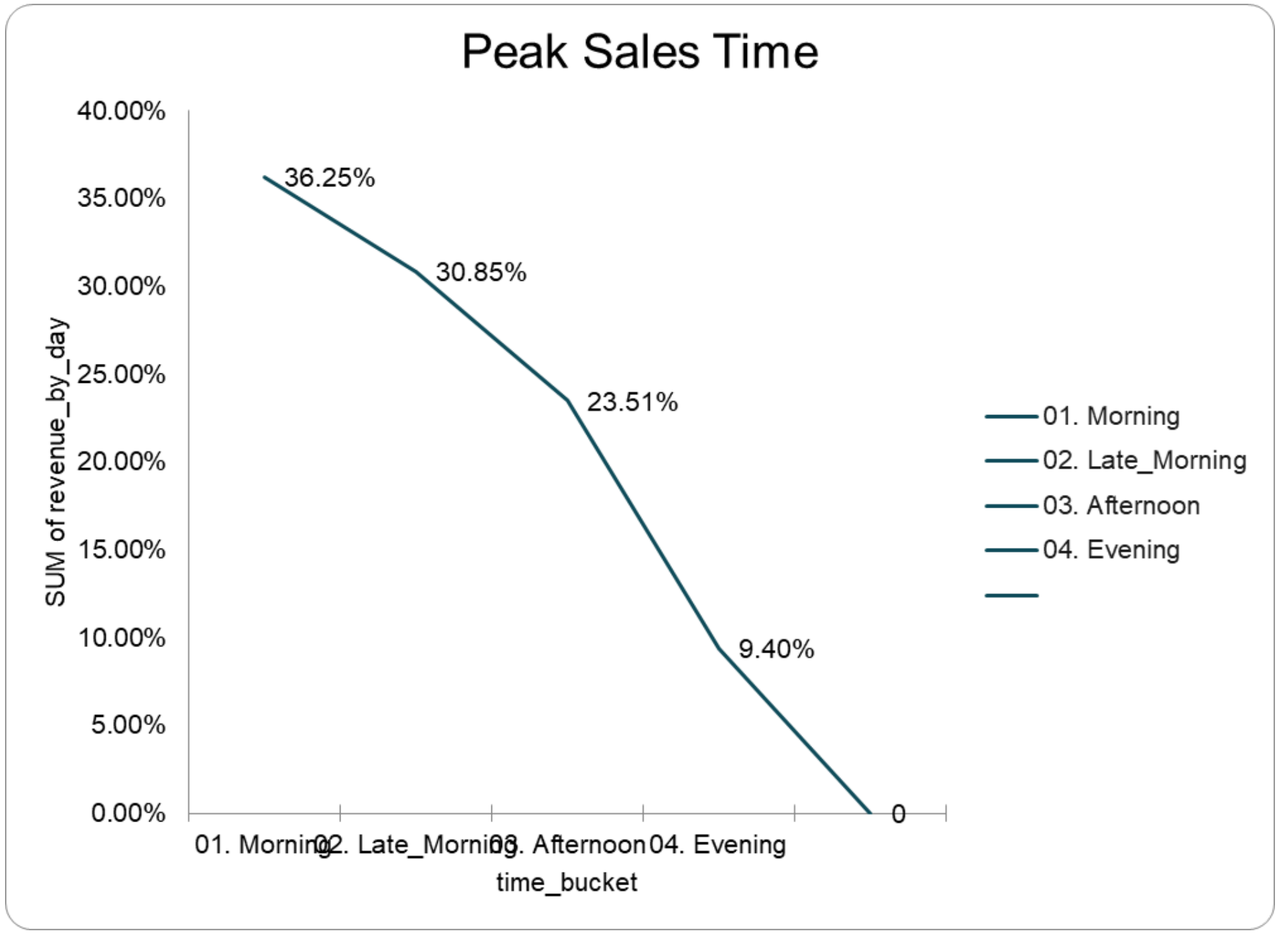
- Coffee generates the highest revenue, contributing the largest share of total sales.
- Tea is the second strongest category and also plays a major role in revenue generation.
- Bakery and Drinking Chocolate provide moderate revenue but significantly less than Coffee and Tea.
- Other categories like Flavours, Loose Tea, and Packaged Chocolate contribute only a small portion of overall revenue



Peak Sales Time

Key Insights

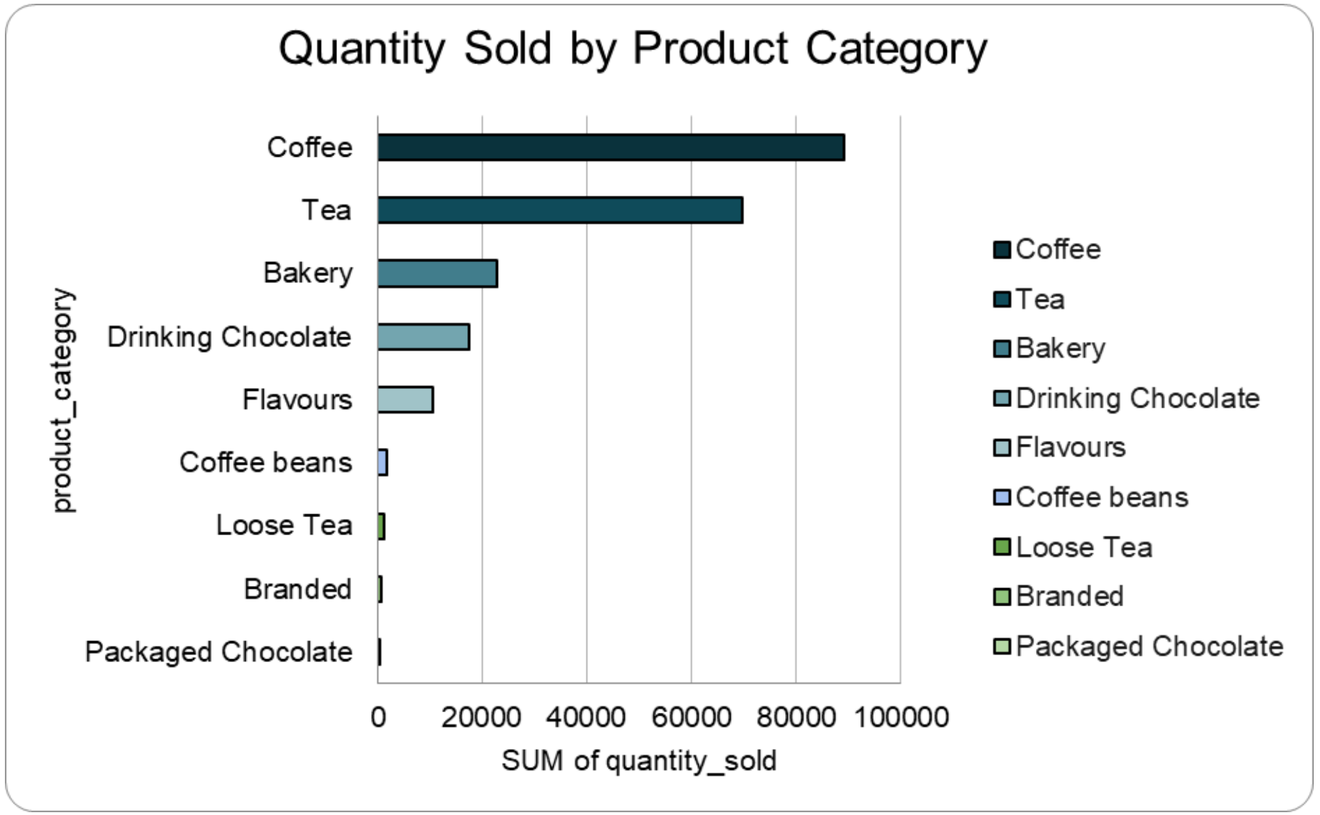
- Customer activity is higher during morning and late morning.
- Afternoon and Evening time slots show lower traffic.



Quantity Sold by Product Category

Key Insights

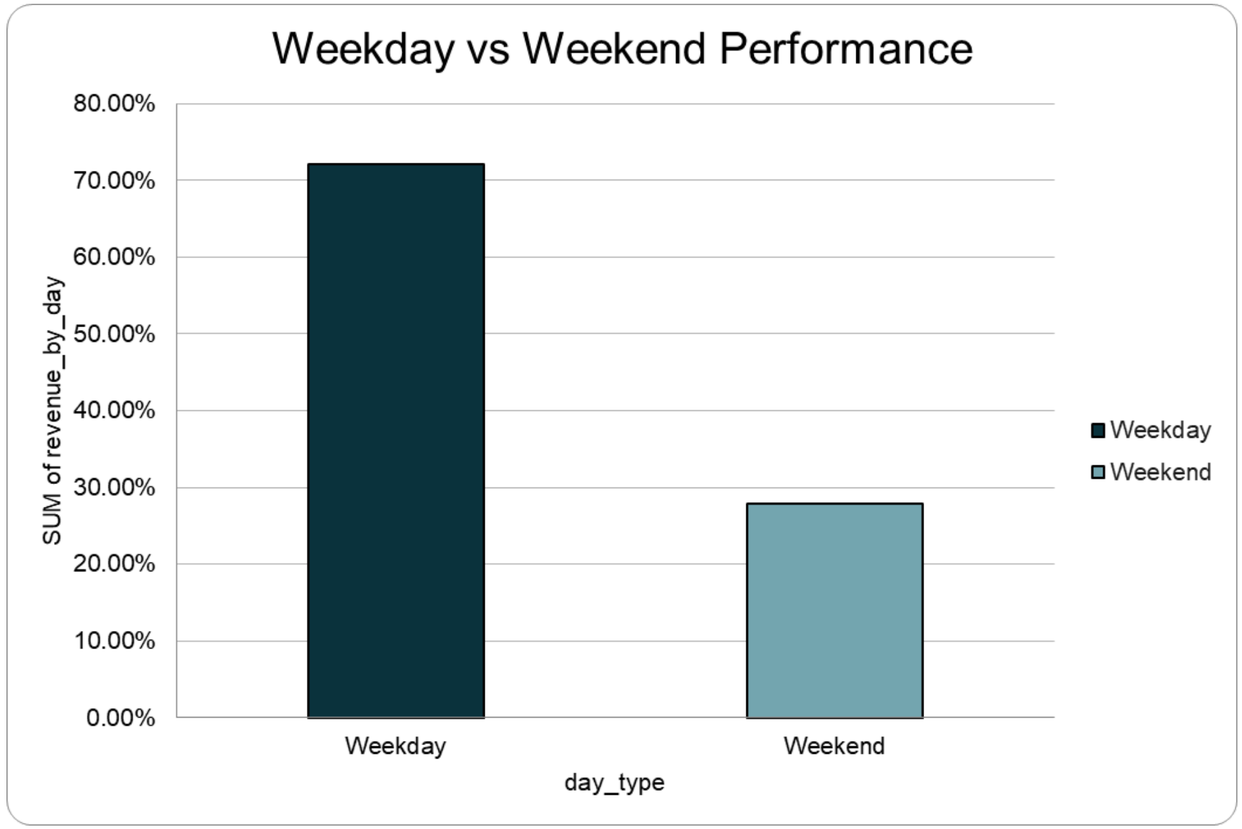
- Coffee and tea products account for most sales.
- They drive both revenue and demand.



Weekday vs Weekend

Key Insights

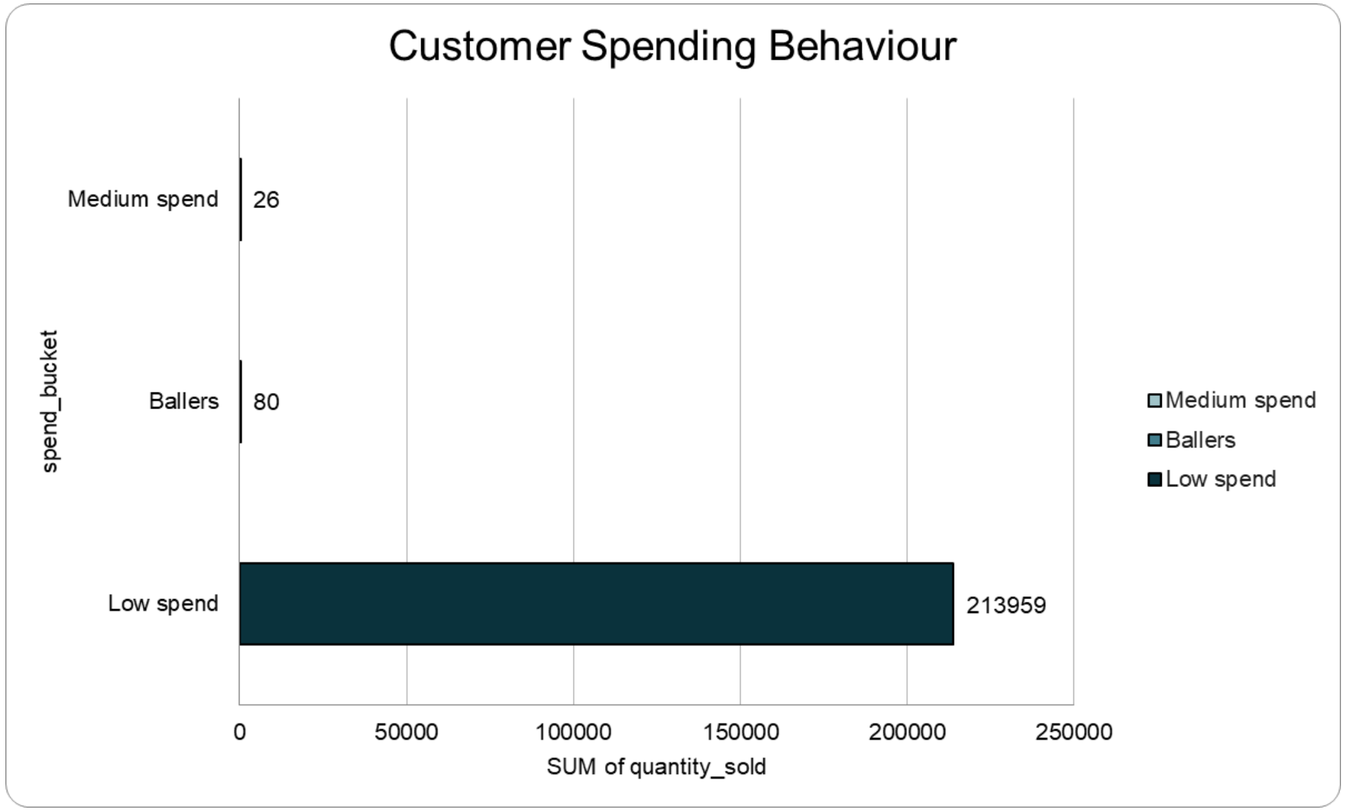
- Sales patterns differ between weekdays and weekends.
- Customer are more likely to visit the store during the week.
- Weekdays generates the highest revenue accounting 72.06% of the total revenue.



Customer Spend Distribution

Key Insights

- The spend bucket analysis indicates that most customers fall into low-spending category, while fewer ballers make higher value purchases.
- This suggests that most transactions involves small purchases than large orders.



Revenue by Store Location

Key Insights

- Hell’s Kitchen store drives a larger share of revenue by 33.84% followed by Astoria (33.23%) then Lower Manhattan (32.92%).

Final Overall Business Insight:

Key Business Findings

- Coffee and Tea are the main drivers of revenue.
- A small number of products generate most of the sales.
- Most customers make low-value purchases.
- Sales peak during specific times of the day.
- Some product categories underperform compared to others.

CEO Recommendations

To improve business performance, the company should:

- Focus on high-performing products
- Promote slow-selling categories
- Increase customer spending through bundles
- Run marketing campaigns during slow periods
- Ensure best-selling items remain fully stocked
